Login Interface

This is the main entry point of the system where users input their email and password to log in. The system automatically detects the user's role (Resident, Admin, or Super Admin) and redirects them to the appropriate portal. It ensures secure access and prevents unauthorized use of the system.

The login interface features a purple gradient background. In the center is a white rounded rectangle containing a purple square icon with a white building icon. Below the icon, the text "Welcome Back" is displayed in bold, followed by "Sign in to your E-Barangay account" in a smaller font. There are two input fields: "Email Address" with a placeholder "Enter your email" and a blue eye icon, and "Password" with a placeholder "Enter your password" and a red lock icon. A purple "Sign In" button is at the bottom.

Resident Dashboard Interface

This dashboard provides residents with a quick overview of their certificate requests and blotter reports. It displays totals for pending, approved, rejected, and pickup-ready requests. Below, users can also view a table of recent requests, including the certificate type, purpose, status, and date. This interface helps residents easily track and manage their submitted requests.

Request Status Interface

This interface allows users to track the progress of their certificate requests. Each request displays its status (Pending, Approved, Rejected, or Ready for Pickup). If a request is approved, the user can download the certificate directly from this page. This section ensures transparency and provides users with updates on their application history.

This interface allows residents to submit requests for various barangay certificates such as Barangay Clearance, Residency, or Indigency. The user selects the certificate type, uploads required documents, provides the purpose of request, and enters payment details if applicable. This form ensures that all necessary information is collected for fast and accurate processing by the barangay staff.

My Profile Interface

This section displays the resident's personal information, including name, address, contact details, government IDs, voter status, and employment info. Users can update their contact information and ensure that their records are complete and accurate. This helps the barangay validate certificate requests and maintain up-to-date resident data.

Admin Dashboard Interface

The admin dashboard provides a summary of key barangay activities, such as the number of registered residents, pending, approved, and rejected requests, as well as active blotter reports. It also shows recent activity and allows quick access to processing certificates and managing the system. This interface helps administrators monitor and manage daily operations efficiently.

Manage Residents Interface

This interface allows administrators to view, edit, add, or deactivate resident accounts. It includes a searchable list of all registered residents with details like name, contact info, and address. Admins can ensure the accuracy of resident records and assist in updating any outdated information when needed.

Request Review Interface

This interface enables barangay staff to review certificate requests submitted by residents. Admins can view the resident’s details, verify uploaded documents, check payment information, and either approve, reject, or mark the request as ready for pickup. The system automatically updates the request status and notifies the resident.

Certificate Upload Interface

Admins use this interface to upload approved certificates in PDF format or Barangay ID images for pickup. The upload triggers an automatic status update, allowing residents to download or view their documents. This feature ensures secure and efficient delivery of official documents.
